

YOUR ADVANTAGES

- ✓ Fluid sequence of movements
- ✓ Suction and lifting in a single process
- ✓ Moving of heavy and awkward loads by just one person
- ✓ Ergonomic and healthy working method
- ✓ Less fatigue in the daily routine
- ✓ Prevention of back problems
- ✓ Easy operation without extensive training
- ✓ Motivation due to technology which is fun

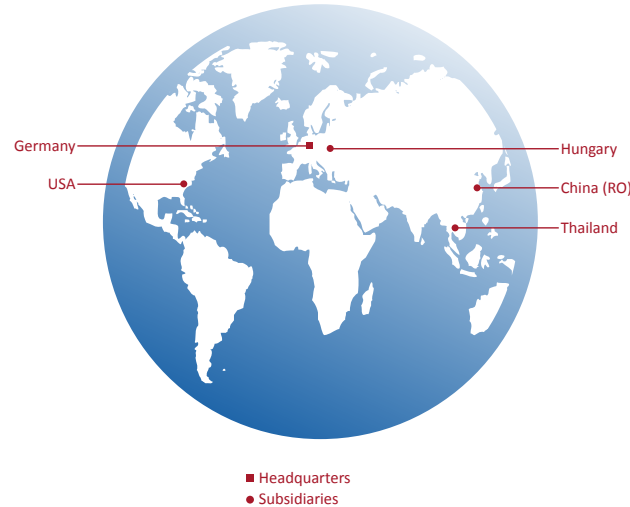

Did you know that ...

- In 2013, one in 12 German employees was unable to work due to back disorders?
- A period of sick leave due to a back disorder lasts an average of 17.5 days - 5 days longer than the average incapacity for work?
- This has caused a drop in productivity of 9.1 billion € in the German economy?

FIPALIFT increases the productivity of your employees and ensures more efficient working processes.

TUBE LIFTERS FIPALIFT

We make your lifting easier!

FIPA
challenge accepted

FIPALIFT Basic

the versatile addition

The FIPALIFT Basic tube lifter with a **lifting capacity of up to 55 kg** is characterized by its high modularity with low investment costs. Its special safety valve also enables the use of a mechanical load handling device, so that even those loads not having any suitable surfaces for applying suction can also be lifted. These include, for example, open storage boxes or beverage crates.

FIPALIFT Smart

for logistics processes

The ergonomic FIPALIFT Smart tube lifter with a **lifting capacity of up to 65 kg** is used most frequently for the moving and picking of packages and crates. The application range covers all in-house logistic processes. The user-friendly control unit enables rapid, fluid movement.

FIPALIFT Expert

for heavy and awkward loads

The FIPALIFT Expert tube lifter with a **lifting capacity of 30 kg to 230 kg** is primarily suited for the lifting of heavy plates, panels or steel sheets such as for the loading and unloading of machines and the transport of heavy bags or crates. The sturdy design also permits operation in particularly harsh production environments.
